

R2C Ready to Connect (top and below)

430-0032

R2C-below and top option: Factory-installed, IPX6 protected and standardised Zhaga interface in the cover of the luminaire housing below the light source and additional interface and Zhaga socket in the top of the luminaire. Not possible with luminaires with [A60] light distribution. The interfaces are covered with a robust protective cap. The luminaire is fully pre-wired and equipped with a DALI LED driver. Depending on the choice of light management system, a corresponding controller must be selected for commissioning and attached to the standardized Zhaga Book 18 interface (Plug'n Play system).
