

Eco Step Dim® Motion Linked-Secondary - Only the first and the last luminaire have an integrated motion detector. These will trigger all the connected luminaires via the additional control phase in each junction box. Cost-effective solution for medium security needs.

Motion sensor for bollards & pathway luminaires:

- IP66, IK07
- housing made out of UL-registered PC
- louver made out of powder coated aluminium (color TBD)
- motion box with built-in Panasonic PIR sensor (areal illumination detection) built into the standpipe (no screws visible from the outside)
- sensor well protected against vandalism, embedded flush in the standpipe
- range max.18x8m (X / Y)
- electronics with high quality relais and power supply inside
- made in accordance European standards

Description	Part ID
Eco Step Dim® Motion - Linked-Secondary	430-0031
