

# Wallwash lens IO-20

**145-9479**

Specifically developed for the lighting of architectural surfaces, in combination with WE-EF [M] symmetric medium beam LED optics. Luminaires fitted with the IO-20 wallwash lens are typically positioned at  $0.125 \times h$  away from the target surface and spaced up to  $1.75 \times d$  apart:

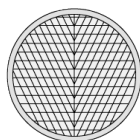

$h$  = height of wall/target surface

$d = 0.125 \times h$  = distance from the wall/target surface

$s = 1.75 \times d$  = spacing between luminaires

The IO-20 LED wallwash lens is factory-installed within the luminaire.

Description	Part ID	C1
Wallwash lens IO-20	145-9479	97
